

June 15, 2022

Transportation Interim Committee

Utah Department of Transportation
Lisa Wilson, P.E., Deputy Director
Teri Newell, P.E., Deputy Director

Advanced Air Mobility Working Group

What is Advanced Air Mobility (AAM)?

- AAM is a new low altitude aerial transportation system for people, goods, and services
- This system consists of:
 - Package delivery drones
 - Aerial taxis
 - Electric commuter and regional aircraft
 - Urban airport infrastructure or 'vertiports'
 - Digital management of local airspace

Working Group Purpose

- Working Group authorized by [SB 122](#) (Sen. Kennedy)
- Required to:
 - Study current laws in the state; and
 - Identify potential changes to state law necessary to facilitate the development of AAM operations
- Parallel study on AAM infrastructure study currently underway ([SB 218](#))
